

Norræn vörunúmer

Norræn vörunúmer - Vnr

- **Saga**

- Upp úr 1970 hófust umræður um norrænan staðal fyrir sameiginlegt, eitt auðkenni fyrir lyf
- Mögulegt að sameina fimm litla markaði sem einn stóran
- 1977 voru norræn vörunúmer tekin í notkun

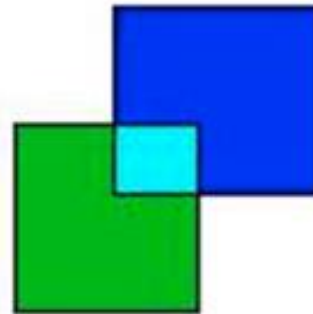

- **Ávinningur**

- 1 vara = 1 lyfjapakking
- Vörunúmer er einkennandi fyrir hverja vöru / lyfjapakkingu
- Sama vara / lyfjapakking fyrir fleiri lönd
- Dregur úr umsjón og kostnaði

98 TABL

Vnr 12 34 56

Medicin 100 mg
Aktiv Substans

Företagsnamn

Strikamerki

- Upp úr 1980 var ákveðið að bæta við strikamerki (EAN bar code) á allar lyfjaumbúðir.
- Strikamerkið er auðkenni fyrir umbúðir.

EAN code (NTIN)

NTIN (National Trade Item Number)

13 tölustafir með:

- stöðluðu númeri
- Vnr númeri
- Check digit

704626 + Vnr + check digit

Norrænt vörunúmer – hluti af strikamerki

Vnr 07 06 32

NTIN – National Trade Item Number

NTIN er GTIN með stöðluðu 6 stafa númeri (prefix)

704626 + Vnr + check number

- Lyfjapakning í mismunandi löndum er með sama NTIN (eitt NTIN fyrir hvert Vnr)
- Lyfjapakning fyrir ólíkar umbúðir er með sama Vnr og sama NTIN
- Fylgiseðlar og upplýsingar geta verið mismunandi og skilið á milli landa

Land	Vnr	NTIN
Danmark	12 34 56	704626 1234569
Norge	12 34 56	704626 1234569
Sverige	12 34 56	704626 1234569

} Sama

NTIN (National Trade Item Number)

NTIN inniheldur Vnr númerið.

NTIN skilur t.d. ekki að umbúðir, þar sem fylgiseðlar eru á mismunandi tungumáli

NTIN er því ekki ótvírætt einstakt auðkenni (unique identifier).

Ef allar umbúðir með sameiginlegu Vnr eiga að vera einkennandi, þarf að nota GTIN kóða til að auðkenna pakkninguna.

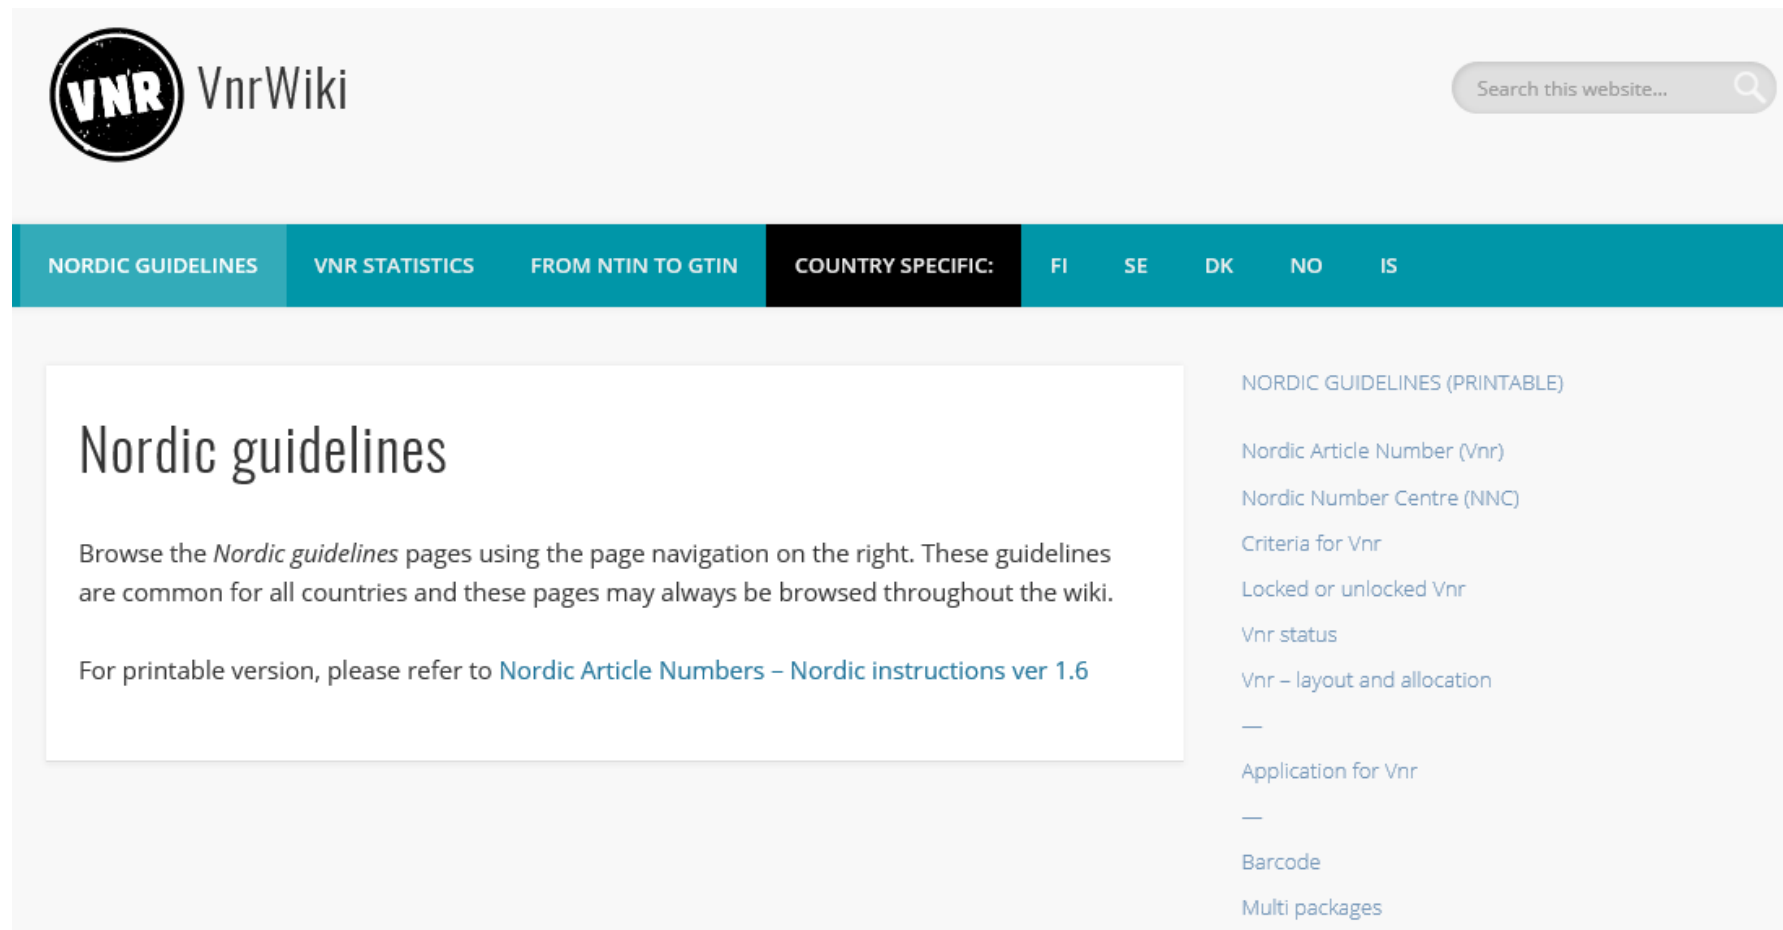

GTIN (Global Trade Item Number)

- Með GTIN er hægt að aðgreina lyfjapakkingar
- Ein vara/lyfjapakking hefur mismunandi GTIN
- Eitt Vnr getur því haft mismunandi GTINs

Land	Vnr	NTIN	GTIN
Danmark	12 34 56	7046261234569	9999123123111
Norge	12 34 56	7046261234569	9999234234222
Sverige	12 34 56	7046261234569	9999345345333

Mismunandi

The screenshot shows the VnrWiki website interface. At the top left is the VnrWiki logo, consisting of a circular icon with 'VNR' and the text 'VnrWiki' next to it. To the right is a search bar with the placeholder text 'Search this website...'. Below the logo and search bar is a navigation menu with several items: 'NORDIC GUIDELINES', 'VNR STATISTICS', 'FROM NTIN TO GTIN', 'COUNTRY SPECIFIC:', 'FI', 'SE', 'DK', 'NO', and 'IS'. The 'COUNTRY SPECIFIC:' item is highlighted in black. The main content area is divided into two columns. The left column features the title 'Nordic guidelines' in a large font, followed by a paragraph: 'Browse the *Nordic guidelines* pages using the page navigation on the right. These guidelines are common for all countries and these pages may always be browsed throughout the wiki.' Below this is another paragraph: 'For printable version, please refer to [Nordic Article Numbers – Nordic instructions ver 1.6](#)'. The right column contains a list of links: 'NORDIC GUIDELINES (PRINTABLE)', 'Nordic Article Number (Vnr)', 'Nordic Number Centre (NNC)', 'Criteria for Vnr', 'Locked or unlocked Vnr', 'Vnr status', 'Vnr – layout and allocation', a horizontal line, 'Application for Vnr', another horizontal line, 'Barcode', and 'Multi packages'.

Transition from NTIN to GTIN

GTIN (Global Trade Item Number)

The Global Trade Item Number™ (GTIN™) is used for the unique identification of trade items worldwide.

Usually 13 characters long, consisting of a country and a company prefix, the company's own item reference and a check digit. The digits can be shown as barcodes or be written on a RFID chip enabling an automatic and faultless identification. The numbering is carried out by the company responsible for the product launch.

NTIN (National Trade Item Number)

NTIN is a GTIN, which prefix is owned by the Nordic Vnr administrator.

(Nordic prefix regardless of the MAH).

NTIN contains the Vnr and is only changed when the Vnr is changed. NTIN does not separate, for example, packages with PLs in different languages or packages with different measurements. NTIN is therefore not necessarily a unique identifier.

If all packages with a common Vnr aren't identical, GTIN codes must be used for identifying the packages. One Vnr can then have many different GTINs.

(for more information about barcodes, [see Barcodes](#))

CHANGE SITUATIONS VNR vs. GTIN

General rule: If Vnr changes → GTIN changes always and more often

Change	VNR	GTIN
Composition of the article: active ingredient	New Vnr required	New GTIN required
Composition of the article: excipient	Same Vnr *	New GTIN required
Trade name	New Vnr required *	New GTIN required
Marketing authorisation holder (MAH)	New Vnr required *	New GTIN required **
Marketer	Same Vnr	New GTIN required **
Pharmaceutical dosage form	New Vnr required	New GTIN required
Strength	New Vnr required	New GTIN required
Pack size (net content) (pcs, g...)	New Vnr required	New GTIN required
Primary package type	New Vnr required *	New GTIN required
Secondary package type	Same Vnr	Same GTIN
Rx → OTC	New Vnr required *	New GTIN required
OTC → RX	Same Vnr	New GTIN required
PIL (se + dk) → PIL (se + no)	Same Vnr	New GTIN required
Adding languages on PIL with no need to separate from old version	Same Vnr	Same GTIN
